PRO-KIT LOWERING SPRINGS

The Eibach Pro-Kit is a set of sports suspension springs that can be used in conjunction with O.E. and other types of aftermarket shocks, especially with the Eibach Pro-Damper. You will sense the sporty road-performance of your vehicle when changing directions and when pulling through curves at high speeds while not sacrificing any comfort. Pro-kits generally lower the car between 25 and 35mm making them ideal for use with either standard or uprated dampers.

PERFORMANCE SUSPENSION

Taking race suspension technology from the track to the road. With a comprehensive range of suspension solutions to fit most fast road applications including the latest performance production cars. Avo products will improve handling, stability and cornering. Improve your road driving experience with Avo. All Avo products carry a 2 year manufacturers warranty.

SPORTS LOWERING SPRINGS

Lower your car to give it an aggressive and sporty stance, uprated by approximately 30% giving reduced body roll, all springs are epoxy coated to protect them from road grime. Stress tested for increased life against fatigue.

EVO 1 SPORT SUSPENSION KITS

If you want to lower your car 50mm+, then the Sports Evo GTZ kits are the only true way to achieve this. Unlike other kits on the market they have shortened body length and pistons for the maximum drop. With adjustable damping rate, and adjustable ride height these kits allow the driver to set up the suspension as desired.
